

## DOSING CAPSULES

For clean and easy loading. Dosing Capsules can be prefilled, stored in the Magazine, and inserted into the Filling Chamber before operation. This way, patients have their daily doses contained and portable.

Dosing Capsules are suitable for herbs. Liquids can be used with the additional Filling Pad.\*

Also compatible with the **VOLCANO MEDIC 2** in combination with the **MEDIC VALVE** Dosing Capsule Adapter.

\*Cannabinoids dissolved in alcohol are only suitable for the **VOLCANO MEDIC 2**.

## MANUFACTURER

At STORZ & BICKEL, we are dedicated to offering consumers a safe and combustion-free alternative to smoking cannabinoids. As the world's first manufacturer to produce medically certified cannabis inhalation devices, we value quality, safety, and performance of our medical Vaporizers above anything else. Our Vaporizers are designed and manufactured in our headquarters in Tuttlingen, Germany. Our medical product line is distributed under the brand VAPORMED.

## INTENDED USE

The **VOLCANO MEDIC 2** and the **MIGHTY+ MEDIC** are intended for vaporizing and subsequently inhaling cannabinoids. The goal is the application of active ingredients in the human body via the alveoli for the appropriate medical indication. It is suitable for the temporary inhalative application of cannabinoids prescribed by a physician for use at home or in a hospital.

## EFFICIENCY

The inhalative application of cannabinoids is the most preferred method to ingest cannabinoids. One of the reasons is the rapid onset of effect. Both, the **VOLCANO MEDIC 2** and the **MIGHTY+ MEDIC** ensure an effective inhalation. They vaporize cannabinoids by hot air, without combustion. As a result, no harmful combustibles are produced. Studies have shown that at least 1/3 of the cannabinoids used in the device enter the bloodstream. **VAPORMED** Inhalers have been used in numerous medical studies and have established their reputation as certified medical inhalers for cannabinoids, licensed for Europe, Canada and other countries.\*

## MEDIC VALVE BALLOON

The removable Valve Balloon allows a large freedom of movement and an application independent of the basic device. Inhalation out of the Valve Balloon is comfortable due to practically no draw resistance. The **VOLCANO MEDIC 2** also has the option of inhaling directly from an attachable Tube.

## MEDICAL AND PORTABLE

**MIGHTY+ MEDIC** is the latest model of the first medically approved portable cannabis vaporizer. It uses a patented, combined conduction and convection heater that ensures efficient vaporization from the first breath.

The portable, battery-powered **MIGHTY+ MEDIC** Vaporizer is easy to use. The two high-performance rechargeable batteries ensure a long service life and a short heat-up time. Its Cooling Unit ensures a pleasant inhalation.
